

Karl Fischer Titration Tester

Karl Fischer Titration Tester (all automatic operation) BGD 232

Product Description

These instruments use Kari-Fischer measurement to measure the trace of moisture in the coating, ink etc. It use ascertaining end-point titrimetry to measure the end-point. It can be used to measure the moisture content in chemical fertilizer medicine, foodstuff, chemical material and other industrial products.

It can absorb and transfuse liquid automatically measure the end-point and drain waste liquid automatically, and show titrimetry value by LED digital display. It has many advatages such as easy to operate, convenient to use and reliable test results etc.

Technical Specification

Polarization Voltage: -20mv

Sensitivity: 10-6A

Distinguish Ability: 0.01ml
End-point Delay: 10±2 second
Titration Flux: control automatically

Power Supply: 220V /50Hz

• Power: 18W
