BGD 8100

Product Description

BGD 8100 UVB Lamp 20W/ 313 nm

for BGD 852 Bench Ultraviolet Light Accelerated Weathering Tester

UVB-313 lamps emit a stronger shortwave ultraviolet light compared to the ultraviolet rays on Earth, thus they can accelerate the material aging process. However, this lamp may cause some unrealistic material damage. It is mainly used in quality control, research and development, and testing materials with strong weather resistance.
