

Digital refractometer ORF-R ORA1RE

Product Description

- The models in the KERN ORA-E range are universal, maintenance-free analogue manual refractometers
- The practical and robust design means that it can be used simply, efficiently and on a permanent basis, day in day out
- The manual effort to convert the value is avoided by the use of several selectable scales and thereby eliminates user error
- These scales have been specially developed, calculated precisely and checked. Another key feature is the very thin, clear lines
- The optical system and the prism cover are made from special materials, which enable you to measure with low tolerances
- All models are fitted with an eyepiece which can be adjusted easily and smoothly to different visual capacities
- The models which are marked "ATC" have automatic temperature compensation, which makes it possible to obtain precise measurements at different environmental temperatures
- Included in the scope of supply:
 - $^{\circ}\,$ Storage box
 - $^{\circ}\,$ Calibration solution
 - $^{\circ}$ Pipette
 - $^{\circ}\,$ Screwdriver
 - $^{\circ}\,$ Cleaning cloth
- Further accessories are available as options

Area of application: Expert applications

The following models have a particularly large measuring range for the refraction index and large divided scales for measuring Brix values.

Main areas of application:

 Universal field of application, primarily for applications which require an extra large measuring range

Digital refractometer ORF-R ORA1RE

Technical Specification

- Included in the scope of supply:
 - $^{\circ}\,$ Storage box
 - $^{\circ}\,$ Calibration solution
 - $^{\circ}$ Pipette
 - $^{\circ}\,$ Screwdriver
 - $^{\circ}\,$ Cleaning cloth
- Further accessories are available as options

Area of application: Expert applications

The following models have a particularly large measuring range for the refraction index and large divided scales for measuring Brix values.
