

## S-42 Sandpaper Strips

### S-42

#### Product Description

---

##### S-42 Sandpaper Strips

The S-42 sandpaper strip includes a pressure sensitive adhesive so that it can be applied to the outer periphery of CS-0 wheels.

#### Technical Specification

---

The S-42 sandpaper strip includes a pressure sensitive adhesive so that it can be applied to the outer periphery of CS-0 wheels. Each strip is 12.7mm x 160mm, 180 ANSI-CAMI, open coat and includes a pressure sensitive adhesive to attach the strip to the periphery of CS-0 (S-32) resilient wheels. The S-42 consists of a very fine aluminum oxide grit, graded as 180 ANSI-CAMI which has an average particle size that is approximately 78µm (0.00304 inches). The paper is an "A" weight which satisfies the paper grammage requirement of 70 - 100 g/m<sup>2</sup>. To maintain the rate of abrasion, the sandpaper strips must be changed after a defined number of test cycles (typically 200 or 500). Applications include high pressure decorative laminates, wood flooring, plastics, furniture surfaces, paints and varnishes. (500 pieces)
